WHITEWATER

Caring about water since 1932

About Whitewater

Whitewater offer design, installation and service of municipal filtration and disinfection systems to tier 1 contractors who work directly for the water municipalities.

Whitewater offer innovative solutions for the filtration and disinfection of municipal drinking water, compliant with S.I. No. 122/2014 - European Union (Drinking Water) Regulations 2014.

By endeavouring to source the latest technologies in use around the world, Whitewater are able to offer and integrate these technologies into our systems. They include

- Cartridge Filtration
- Automatic Screen Filtration
- Pressure Filtration
- Multimedia Filtration
- Activated Carbon
- Microfiltration
- Ultra Filtration

Sustainable Solutions

Systems offered for Disinfection include:

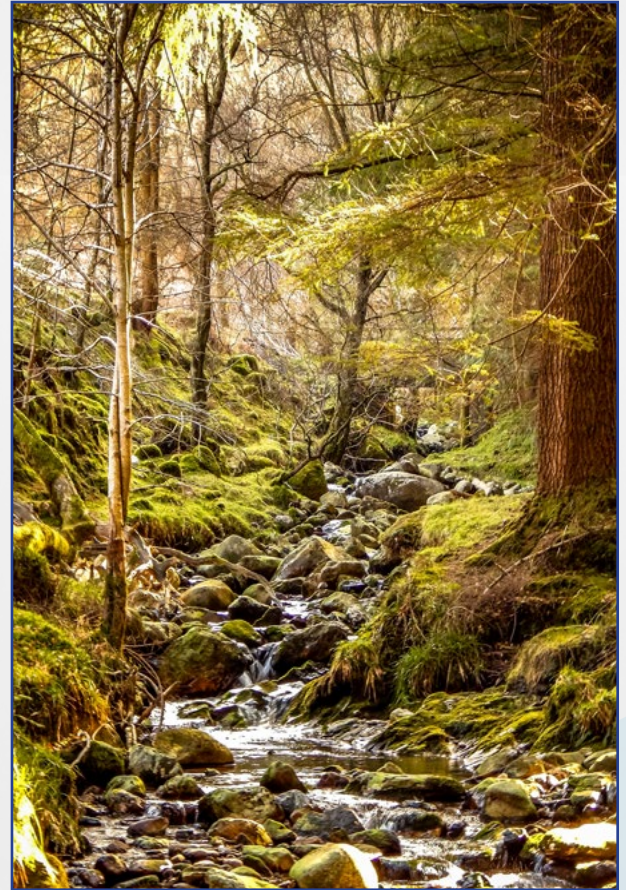

- Validated Ultraviolet Generators
- Chlorine Dioxide Systems
- Hypochlorite Generations Systems
- Gas Chlorination Systems
- Disinfection Dosing System

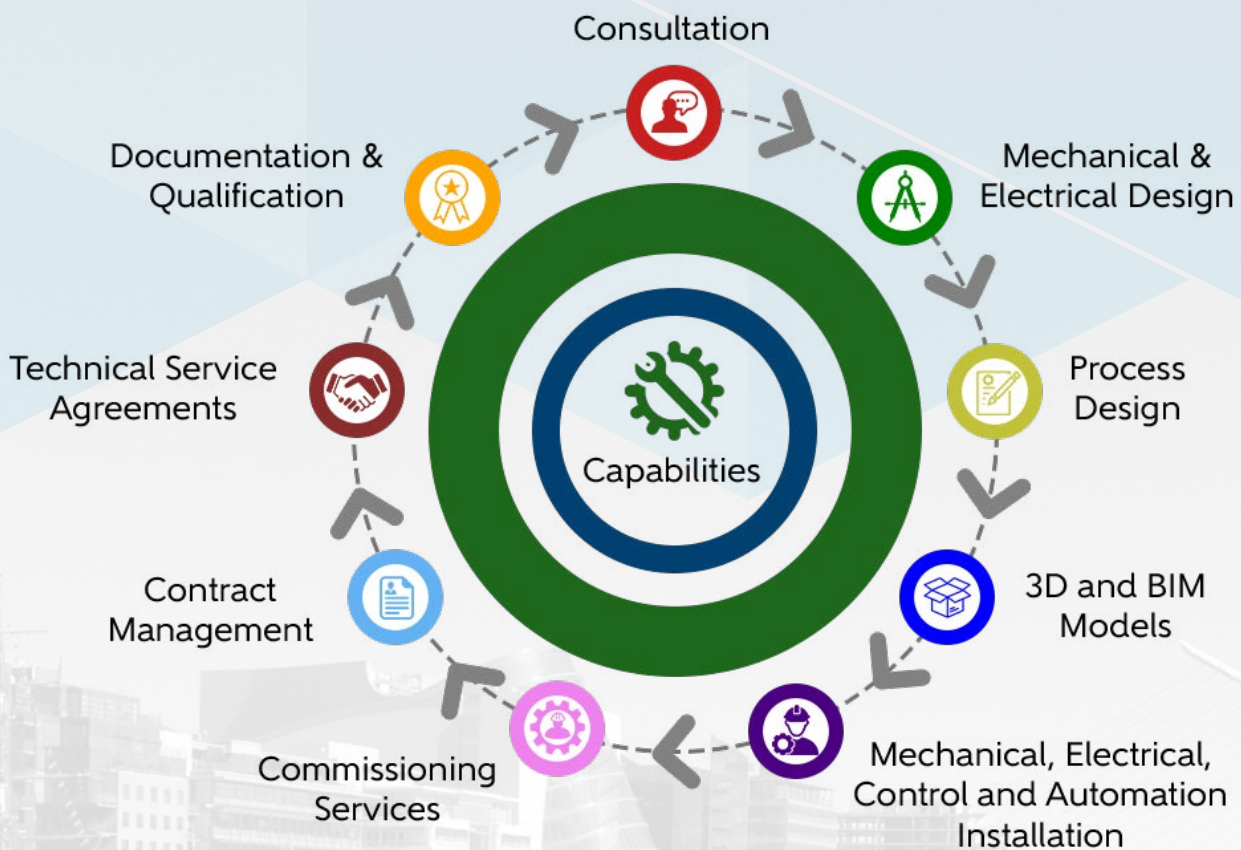

Benefits of Sustainability

As the industry searches for ways to solve to its water related challenges, Whitewater utilises its combined expertise in water treatment systems, water chemistry and plant operations to develop systems that address these challenges. Our key benefits are:

- **Up to 48% in energy savings**
- **88% reduction in drain water**
- **Chemical free design**
- **Water usage hierarchy design**
- **100% of blow down water for reuse**
- **20% less footprint requirement in plantrooms**
- **Increased CoC with 50% reduction in slowdown frequency**

Our Capabilities

Contact us for a review of your current system and to find out how we can deliver improved performance, sustainable energy, water and cost savings, and help you reduce your CO2 footprint.
